"RISK FACTORS"

The Portfolio Manager is not responsible for the loss if any, incurred or suffered by the Client. The following are the inherent risks associated in the management of Portfolio:

General Risk Factors applicable to all portfolios:

(i) The securities investments are subject to market risk and there is no assurance or guarantee that the objectives of the portfolio concepts/products will be achieved. Clients/ Investors are not being offered any guaranteed or assured return on the portfolio.

(ii) The portfolio managers do not have any previous experience/ track record. It's an entity incorporated on 8th May 2019.

(iii) All transactions of purchase and sale of securities by the Portfolio Manager or its employees, who are directly involved in investment operations, if found having conflict of interest with transactions in any of the Investor's portfolio will be disclosed to the Client.

(iv) Risk arising due to policy changes

(i) The performance may be affected by changes in government policies, general levels of interest rates and risks associated with trading volumes, liquidity and settlement systems in equity and debt markets. While Securities that are listed on the Stock Exchanges carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the Stock Exchanges.

(ii) The past performance does not in any manner indicate the future performance of the portfolio concepts.

(v) Risk arising from the investment objective, investment strategy and asset allocation.

The PMS is run with an objective to achieve reasonable returns consistently.

Given this background the investor investing in the PMS faces the following risks:

(i) Political, economic and / or related risks

The Assets value of the portfolio and the liquidity of the Securities may be affected by changes in government policy, taxation, interest rates, social and religious instability and political, economic or other developments in or affecting India.

(ii) Industry risk

The value of shares of companies in a particular industry may be affected due to factors affecting the industry like changes in government policy on duties, FDI or a foreign country, which is a big market for the industry, may impose restrictions on import etc.

(iii) The Indian Securities Market

The Indian stock markets in the past experienced substantial price volatility and no assurance

can be given that such volatility will not occur in future. Actual market trend may be in variance with anticipated trends hence, the decisions of the Portfolio Manager may not be always profitable.

(a) Debt Security: Investments in debt instruments and other fixed income securities are subject to default risk, liquidity risk and interest rate risk. Interest rate risk results from changes in demand and supply for money and other macroeconomic factors and creates price changes in the value of the debt instruments. Re-investment Risk: This risk refers to the interest rate levels at which cash flows received from the Securities under a particular portfolio are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.

(b) Gold Exchange Traded Fund: currency risks, counter party risk, liquidity risk and loss of physical gold.

(vi) Liquidity Risk

Some stocks that the investor might be invested in might not be highly liquid. Though it will be the PMS service providers endeavor to restrict investments in less liquid stocks to a lower limit, there is an exposure of liquidity risk to the investor.

(vii) Risk arising out of non-diversification

The Portfolios may be concentrated in a limited number of scrips owing to the investment objectives of respective portfolio concepts or the market conditions prevalent at various points in time. This may pose the 'non diversification risk' to the portfolio performance."
